

# FOOD INSECURITY AND UNDERNUTRITION SITUATION AMONG URBAN POOR IN INDIA

*Fact Sheets, Reports, Journal Articles (2000-12) and Presentations*

## I. FACT SHEETS:

---

**Fact Sheet: Nutrition and Health of URBAN POOR WOMEN in INDIA: Key findings from the Third National Family Health Survey: 2005-06. November, 2011.**

Link: <http://uhrc.in/name-CmodsDownload-index-req-viewdownload-cid-2-orderby-dateD.html>.

The fact sheet presents nutrition and health and urban poor women 15-49 years in India compared to their non-poor counterparts, rural average and national average, based on a wealth quartile analysis of the urban sub-set of Third National Family Health Survey (NFHS-3) conducted in 2005-06. The bottom quartile was taken as representative of the urban poor. The other three quartiles were clubbed and considered urban non-poor.

**Fact Sheet: Nutrition and Health of URBAN POOR CHILDREN in INDIA: Key findings from the Third National Family Health Survey: 2005-06. November, 2011**

Link: <http://uhrc.in/name-CmodsDownload-index-req-viewdownload-cid-2-orderby-dateD.html>

The fact sheet presents child nutrition status, infant and young child feeding practices and child health indicators of urban poor children in India compared to their non-poor counterparts, rural average and national average, based on a wealth quartile analysis of the urban sub-set of Third National Family Health Survey (NFHS-3) conducted in 2005-06. The bottom quartile was taken as representative of the urban poor. The other three quartiles were clubbed and considered urban non-poor.
